SKILLS

- HTML
- CSS
- JavaScript
- React.js
- Next.js
- Typescript,
- TailwindCss
- Scss
- Git
- Github

PROJECTS

Facebook Clone using mock server 🔗 2024

Nextjs, React Query, Shadcn/UI, Typescript, Tailwind Css

- **Currently developing** a Facebook clone using Next.js, React Query, Shadcn/UI, TypeScript, and Tailwind CSS.
- **Replicating** the look and functionality of the original platform, ensuring a familiar user experience.
- **Utilizing** a Postman mock server to fetch data, demonstrating frontend development skills.

Cobalt Clone 🔗 2023

Next.js, TailwindCss

- **Developed** a clone of the Cobalt financial management tool landing website using Next.js, TypewriterEffect, and Starfield Animation.
- **Crafted** an engaging and interactive user interface, prioritizing responsive and adaptive design principles.
- **Showcased** expertise in modern web development by replicating key features and aesthetics of the original application.

ReactBoard 🔗 2023

React.js, MaterialUI, ChartJs

- **Adapted** the Material design template, integrated mock data sources, and collaborated to optimize user experience.
- **Developed** a comprehensive dashboard application by utilizing knowledge of MaterialUI and React.
- **Successfully** delivered a stand-alone project with problem-solving abilities.

EXPERIENCES

ERP OJT Training

Ongoing Training Program

03/2024

Remote

Rich Text Editor Evaluation [↗](#)

React, Nextjs

- **Explored** the pros and cons of rich text editors using various tools including Lexical, TinyMCE, Tiptap, and others.
- **Evaluated** functionality, user experience to inform team decisions.
- **Contributed** insights and recommendations as part of the React.js and Next.js team.

GITHUB CONTRIBUTIONS

Mijn-UI-HTML-Version

- **Contributed** to the development of the UI component library Mijn-UI-HTML-Version, providing backend teams with reusable UI components.

The Wall of Projects

- **Contributed** to "The Wall of Projects" repository, a collaborative platform for showcasing diverse projects from developers worldwide.
- **Assisted** in enhancing project details, code organization, and live link functionalities to improve user experience.
